"Reseña del editor Cities in China are extremely dynamic and experience high pressure to grow, transform and adapt. But in what directions, on what basis and to which goals? The authors and their team have researched the intensive transformation processes of about twenty-five neighborhood communities that were created in Beijing, Shanghai, Shenzhen, and Suzhou in the last 30 years, ranging from inner-city to peripheral areas, starting from planning and leading up to user satisfaction studies. This in-depth overview on neighborhood typology and development in China follows the book Emergent Architectural Territories in East Asian Cities by Peter Rowe, who is among the world's best scholars on urban transformation in East Asia, together with his colleagues Ann Forsyth and Har Ye Kan. Biografía del autor Ann Forsyth, Prof. of Urban Planning; Peter G. Rowe, Prof. of Architecture and Urban Design; Har Ye Kan, Research Assoc.; Harvard GSD"

Based on the above the background to the municative turn in western planning theory can be summarized into two main parts one is the goal for planning to shift from a purely functional stance including emphasizing economic growth to multiple objectives because of the demands for quality of life environmental protection and the diversification of society
